

**MIC 2009 Conference Proceedings**  
**INSTRUCTIONS**  
**(A refereed publication of the MIC 2009 Conference)**

Only full papers will be published in the Proceedings. Final papers must follow the format specified below, as they are published on a CD in form of a single booklet and not as separate files. This assures that the Proceedings fulfil the standards for a refereed publications and increases the academic recognition of our work. Accordingly, the standards set below will be strictly enforced.

1. **Length:** Full papers must be between ten (10) and twenty (20) pages in length, including tables, figures, references, abstract and keywords list. Papers longer than twenty pages will be returned to the author for modification and may not appear in the *MIC 2009 Conference Proceedings*. This is because the Editor will not know where to make revisions and would omit the last page(s).
2. **Typeface and spacing:** Must be 12-point Times New Roman type (or very similar typeface) for ALL TEXT. Spacing 1.5 lines.
3. **Page Length:** No page should exceed 55 lines of writing, as page numbers have to be added before printing.
4. **Page Numbers:** Do not put page numbers at the top or bottom of the pages. These will be added when *MIC 2009 Conference Proceedings* is produced.
5. **Page Size:** The page size is standard A4 (21.0 cm by 29.7 cm). Papers sent with other page sizes will be returned to the author for revision.
6. **Margins:** All four margins (top, bottom, left and right) must be one (1) inch or 2.54 cm. The page layout defined here generally follows the Guidelines of the American Psychological Association (APA) 1994.
7. **Alignment:** The paper as a whole should have justified alignment, except for the title and 1<sup>st</sup> headings, and authors (see bellow).
8. **Title** must be in 14-point bold type, Times New Roman and centered across the top of the page. The title is to be in all uppercase.
9. **Headings:** 1<sup>st</sup> level heading must be in 12-point bold uppercase Times New Roman centered, 2<sup>nd</sup> level heading in 12-point bold Times New Roman, and 3<sup>rd</sup> level heading in 12-point italic Times New Roman.
10. **Authors:** All names should be centered across the page, supplying the name, university affiliation, country, and e-mail address in 12-point type bold, Times News Roman. The e-mail address is to be in lowercase.
11. **Abstract:** Please provide a 150-250 word abstract, in italics, 12-point type immediately following the names of the authors.

12. **Keywords:** Select three to five keywords that capture the essence of your extended abstract or full paper. List the words in decreasing order of importance from left to right immediately below the abstract. Keywords will be used for an electronic index of your paper.
  13. **References:** Sources should be alphabetically ordered by author's last name, numbered, and referenced by number in the body of IIS submission. This will ensure uniformity in the printing of the Proceedings pages. The page layout defined here loosely follows the guidelines of the American Psychological Association {APA} 1994. Please type the word REFERENCES (bold, 12 point, Times New Roman) above the reference section
  14. **Filename:** Use "MIC2009" and the last name of the (first) author as the filename for the Word file when submitting for the *Proceedings* (e.g. "MIC2009-Smith.doc").
  15. **Language and Language Mechanics:** The language of the MIC 2009 Conference is English as it is the most commonly used academic and technical language in the world today. However, the Proceedings Editor will not be able to edit the language mechanics of each submission.
  16. **Tables and Figures:** The formatting of tables and figures is left largely up to the authors. Tables and figures should be sized and placed in the body of the paper just as the authors want them printed in the Proceedings. Care should be taken so that tables and figures are not separated between pages. Generally, tables and figures should be in Times New Roman 10 or 12 bold type, and table column headings should be in underscored. Graphics should be clearly rendered so as to yield attractive, readable black-and-white copies. ALL GRAPHICS SHOULD BE INCLUDED IN THE PAPER.

## GLOBAL ISSUES IN ONLINE LEARNING COMMUNITIES

Dr. John Smith, University of Primorska, Slovenia  
john.smith@upr.si

### ABSTRACT

*The Faculty of Management University of Primorska recently launched a Master of Science (MS) in Management Education degree programme with a concentration in distance learning. This paper outlines the development and implementation of this programme.*

**Keywords:** Author guide, manuscript, camera-ready format, instructions for authors, paper specifications

### INTRODUCTION ←(this is a Level 1 heading)

The DL concentration integrated in the ME program is uniquely designed to provide an interdisciplinary education in conjunction with a technical background in Computer Science. The basis for entry into the programme focuses on the “whole-person concept” which considers work experience, courses and training while employed in industry or government, prior academic achievement and the Graduate Record Examination scores.

### General Outline of INFOSEC ←(this is a Level 2 heading)

The ME programme at UP provides professional development opportunities for those employed in ME, as well as information systems managers, computer science professional/professionals, programmers, operations staff, analysts and information planners (1).

The results of this programme provide content relevant to the needs of the information security and computer science professional working in state and federal government, the military, industry and businesses and academic (2).

## CONCLUSION

Responding to the demand from the technology and security communities, the programme is designed to develop advanced competencies and the knowledge and skills necessary to understand relationships between information security and computer science.
